## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1 and 3-9 allowed.
2. The following is an examiner's statement of reasons for allowance: prior art discloses a permanent-magnet motor comprising: a stator having stator winding of plural phase, a rotor facing the inside of the stator, across a gap pad having a core, and a permanent magnet provided to the rotor core assembly made by multilayering multiple pieces of core lamination, each having plural containing holes for inserting the permanent magnets, wherein the permanent magnet is made so as to have both a convex part to the inner diameter side and a convex pad to the outer diameter side in a cross section taken vertically to an axis; wherein a focus of magnetic orientation of each magnetic pole of the permanent magnet is located outside of the rotor. Prior art also discloses, the radius of the convex pad to the inner diameter side of the permanent is smaller than the radius of the convex pad to the outer diameter side of the permanent magnet. Wherein, the radius of the arc of the outer diameter side of the containing hole is set to  $R < r$ ; and the thickness of the rotor core is separated by a permanent magnet and a gap.
3. However, Prior art does not disclose a permanent magnet motor having a rotor core wherein the thickness of the rotor core, which separates the permanent and the gap is made within  $\pm 30\%$  of a thickness of the rotor core lamination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
